## R Markdown

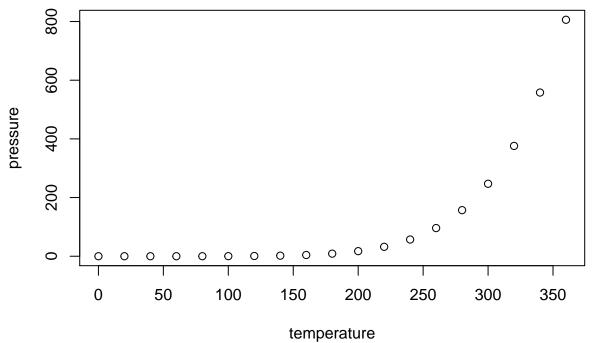

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
enr_age <- read.csv('enr_by_agegrd.csv')
staff_ed <- read.csv('staff_by_ed.csv')
ent_new <- read.csv('new_entrants.csv')
schage_pop <- read.csv('schage_population.csv')
staff_qf <- read.csv('staff_by_qlf.csv')
stu_grd9 <- read.csv('Grd_0910Students.csv')
acad_grd9 <- read.csv('Grd_0910Academics.csv')
acad_12 <- read.csv("Grd1112_Academics.csv")</pre>
```

## **Including Plots**

You can also embed plots, for example:

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
